Lulu Island Brewery

We are farmers

With our multiple vineyard locations, we are able to cultivate the best grapes in the best climate. The Okanagan has optimal temperatures for many grapes especially our icewine grapes which need to reach freezing temperatures before harvesting. Here in Richmond, we grow two varieties that thrive in the cooler climate of the Lower Mainland.

We work to honour the ground that provides us with fruit for our wine. We understand the importance of the earth and our duty to preserve it. This is why we have a full circle farm that puts as much back into the soil as it takes. Our grape must and biodegradable waste is placed back into our land to enrich the soil and reduce waste.
